

RDR42x0 Series (RDR4220, RDR4250, RDR4280)

Intrinsically Safe Approved Accessories for use in Hazardous Locations

The RDR42x0 Series transceivers, which are labeled with the SGS certification mark (shown below), on the packaging boxes, on the transceivers and on the battery packs used with them, are certified for Intrinsic Safety (IS) for use in hazardous locations and meet the following standards: UL 913 5th Ed., TIA 4950-A, CSA C22.2 No. 157-92, Class I, II, III; Division 1; Groups C-G / Division 2; Groups A-G; Temp T3C.

WARNING: The RDR42x0 Series transceivers are certified to be used ONLY with specific battery packs and specific optional audio accessories. The use of any NON-APPROVED battery packs or audio accessories VOIDS completely the transceivers IS rating and they are no longer certified for use in hazardous locations.

For further details related to this IS certified transceivers or a full list of approved RCA accessories, please contact your RCA Communications Systems Dealer.
